

# Becky

A **Becky** is an average young woman. She is subordinate to Stacy in terms of looks and social status.

Despite their lower position on the social totem pole, young Beckies will nonetheless ignore around 80% of men, including their looksmatches, unless said looksmatches happen to earn at least as much as she does. This sexual jockeying often puts them at odds with both each other as well as with Stacies, inciting fierce intrasexual competition and eating disorders. Although Beckys will gleefully fuck Chad, Beckys will often end up settling for a betabux Brad or a high-tier normie when she begins to approach the Wall or wants to raise a child, and hence fails to secure Chad.

## Decile

High-tier, Mid-tier and Low-tier Becky is 7/6/5 on the decile scale, encompassing high-tier female normies as well as both sides of the mid-tier normy classification.

## "Nerd"

Often Becky's try to navigate around their looksmatch by becoming a *fake nerd*. In the 2010s, nerd-dom became *almost* hip due to the rise of social media, and therefore women now wanted to be apart of it. Though not for their looksmatch, but to get access to Betabux engineers and wealthy start-up founders (see also women in STEM). Thus, we saw the rise of IM LIEK SUCH A NERD LOL.

## Validation-seeking

Validation-seeking means seeking out compliments to boost one's own confidence e.g. by maintaining a set of beta orbiters. Women appear to use dating apps primarily for this purpose,<sup>[1]</sup> and it is part of the sexuality that consists in conspicuously advertising their curves to get the attention of Chad. As Beckies aren't the best looking girls, they are more

uncertain of their status and hence are thought to need more validation.

Whenever women experience a narrowing in their dating pool and a reduction in the amount of IOI's (indicators of interest), e.g. when hitting the wall or leaving breeding grounds such as colleges, women may engage more in this behavior.

It seems Beckies advertise and sexualize themselves more the more economic inequality there is to get attention of the few economically stable males.<sup>[2][3][4][5][6]</sup>

## Low self esteem

---

Most Beckies compensate at some point. Most average woman are terrified of the "average life", especially having to admit to their femoid friends that it is only average. Hence they travel and go on ridiculous spending sprees to prove their worth. Entire industries have formed around this, e.g. shopping malls and selfie stick manufacturers. This comes with bombarding their social media with pictures of food and lavish venues.

Beckies will also take photos of themselves with hot guys during vacations and parties to signal wealth and status. The most well known example of this phenomenon is *Anna Sorokin*.
