

Incelosphere

The collection of communities, vlogs and blogs where incels gather is called the **incelosphere**. The people who frequent the incelosphere communities are called **incelospherians** and cybercels. Subjects related to the incelosphere are deemed **incelospherian**.

The incelosphere is mostly confined to forums and Youtube. Abtreffers are arguably the most developed community in the incelosphere. Among the most distinctive aspects of the incelosphere is the sheer amount of protologists and neologists who coin new words. The mere existence of the incelosphere has helped a lot of truecels overcome their depression, purely out of the knowledge that they're not alone, and that there are other truecels out there like themselves. There are scores, or perhaps even hundreds of vlogging channels, websites, and forums in the incelosphere.

This article discusses both the history of online spaces frequented by incels as well as forms of media that imbricate on this phenomenon.
